Summary

Front-End Developer with expertise in JavaScript, React.js, and Node.js, proficient in creating responsive web applications with a focus on RESTful APIs and best coding practices. Strong understanding of web app architecture, version control (Git), and collaborative development. Committed to continuous learning and delivering high-quality user experiences.

Languages: HTML5, CSS3, JavaScript, TypeScript, MongoDB, Express.js, React.js, Node.js, MySQL

Tools & Technologies: Git, GitHub, Heroku, Visual Studio Code, MongoDB Atlas, Postman, Insomnia

Concepts: Responsive Web Design, RESTful APIs, CRUD operations, Agile methodologies

Professional Experience

Front-End Developer – Project Web App, One York Construction Management, Toronto, ON, 2020 – 2024

- Directed development of a Web Application Project Hub for architectural presentations and construction project data.
- Designed and built a React.js-based frontend to integrate design drawings, technical documents, and progress photos.
- Implemented real-time updates for designs and documents, eliminating reliance on static PDFs.
- Developed UI components for version control, timelines, and progress tracking, enhancing transparency.
- Collaborated with backend developers to integrate REST APIs, ensuring seamless data flow.
- Applied responsive web design to optimize performance across devices for both on-site and office users.

Architectural Technologist, Hariri Pontarini Architects, Toronto, ON, 2018 – 2020

- Managed multiple projects simultaneously while adhering to strict deadlines and quality standards.
- Delivered high-quality technical drawings using AutoCAD and Revit software, ensuring accurate representation of architectural designs.
- Improved project timelines with effective coordination of multidisciplinary teams during the design process.
- Worked with licensing, permitting, planning and inspection authorities to evaluate and resolve concerns.

Architectural Technologist, NORR, Toronto, ON, 2016 – 2018

- Enabled data-driven design techniques, utilizing analytics to inform design decisions, reducing revision cycles.
- Streamlined project workflows for improved collaboration between architects, engineers, and construction teams.

Education

Certificate in MERN Full Stack Web Development, University of Toronto, Toronto, ON, 2022-2023

- Mastered full-stack development technologies including MongoDB, Express.js, React.js, and Node.js.
- Specialized in developing dynamic, responsive web applications using RESTful APIs and modern JavaScript.

Advanced Diploma in Architectural Technology, George Brown College, Toronto, ON, 2015 – 2018

- Graduation Dean's List, 2017
- Graduation with Distinction, High Honors 2018
- OAAAS Technical Excellence in Architectural Technology, 2018

Bachelor's in Architectural Engineering, Technical University of Moldova, Chisinau, Moldova, 2005-2010

Developed a solid foundation in Architectural Design, Urban Planning, Construction Engineering Project Management
